

Work History

- July 2024
— August 2026

Soventure / *Travel Insurance Aggregator*
Senior UX Designer
Led the redesign of Soventure's customer-facing travel insurance website. Conducted interviews and research to understand how insurance coverage shapes travelers' purchase decisions, translating findings into design recommendations. Used site analytics to identify opportunities to improve speed and usability.
- July 2019
— February 2024

FirstThought / *Expert network for healthcare and life-sciences*
Product Manager
Designed the initial web-based expert network product. Product overlays the machine learning engine, cutting the research time from several days to a few hours for a 25 person analyst team.
In support of the expert network service, designed an interactive survey to vet +7,500 candidates annually, while meeting compliance standards.
Complete responsibility for company public web site, our primary marketing channel. Design, code, write content, film and edit video and analyze user engagement metrics.
- February 2016
— May 2019

Cureatr / *Medication management technology and services*
Senior UX Designer
Designed and prototyped a med-rec tool doctors and pharmacists use in filling out prescriptions. Created a complementary internal messaging tool for staff communications. App used in +20 hospitals, nationwide.
Introduced innovative graphical tools to alert practitioners to gaps in medicine and potential overdose.
- April 2014
— December 2015

Quality Reviews / *Real-time patient feedback app*
Head of Product Design
For patients, designed a mobile-based survey and feedback tool. For healthcare providers, created a web-based dashboard to monitor and improve the patient experience. App used by 21M patients and 10 of the top 35 healthcare providers nationwide.
- November 2011
— April 2014

Axial / *M&A and capital raising platform for the middle market*
Lead UX-Designer and Product Development
Led user-experience and visual design of the capital raising platform.
Managed and oversaw the relationship between the design team and front-end engineering team, a combined group of 5 people.
- February 2008
— November 2011

Gerson Lehrman Group / *Financial and global information services company*
Senior UX/UI Designer
Designed the web-based expert network product. Analyzed performance metrics, incorporate insights into design iterations
Managed and trained 2 junior designers in digital design.
